Global Aluminum Powders, Pastes, and Flakes Market 2015-2019

Description:
About aluminum powder, flakes, and paste
Aluminum powder is a fine granular powder usually spherical or spindle in shape. It is widely produced by the atomization of pure molten aluminum metal that is converted into fine droplets, solidified, collected and used for various applications. Aluminum flakes are derived from aluminum powder by dry ball milling process, typically in irregular shapes under microscopic examination. Aluminum paste is made from aluminum powder by wet ball milling process using solvents (or by mixing a milled flake powder) such as isopropyl alcohol, ethyl acetate, and xylene.

The report forecasts the global aluminum powder, flakes, and paste market to grow at a CAGR of 4.8% over the period 2014-2019.
