Description: Growing consumer awareness, rising focus on dental aesthetics, expanding middle-class population with increasing disposable incomes in developing nations, and rising dental tourism in emerging markets are the major factors driving the growth of the cosmetic dentistry market.

With rising focus on technological innovations and the increasing trend of R&D investments, various new products such as dental implants and equipment are being launched in Cosmetic Dentistry market, which are expected to further propel market growth. However, a lack of reimbursements for cosmetic dental procedures and the high cost of dental imaging systems could restrain the growth of this market during the forecast period.

In this report, the cosmetic dentistry market is segmented on the basis of product and region. On the basis of products, Cosmetic Dentistry market is segmented into dental implants, dental bridges, dental crowns, dental veneers, dental systems and equipment, orthodontic braces, bonding agents, and inlays and onlays. Of these, the dental systems and equipment market accounted for the largest share in 2014, owing to the wide applications of dental equipment such as dental chairs, handpieces, and CAD/CAM systems in dental procedures.

Geographically, the global cosmetic dentistry market is segmented into North America, Europe, Asia-Pacific, and the Rest of the World. In 2014, Europe commanded a major share of the cosmetic dentistry market; however, Asia-Pacific is expected to witness the highest growth rate during the forecast period.
