Global Enhanced Oil Recovery Market Forecast and Opportunities, 2020

Description: According to the report “Global Enhanced Oil Recovery Market Forecast & Opportunities, 2020”, the global enhanced oil recovery market is projected to witness growth of around 8% through 2020. With a share of over 30% in 2014, North America is forecast to continue its dominance in the global enhanced oil recovery market during 2015 - 2020. Over the next five years, onshore crude oil reserves are expected to witness higher crude oil production through enhanced oil recovery methods compared to off-shore oil reserves. Gaseous enhanced oil recovery methods are expected to lead the global enhanced oil recovery market, with the most favorable substance used for this method being carbon dioxide.

To meet the increasing demand for crude oil, employing tertiary methods of crude oil production is essential. Over the last few years, global Enhanced Oil Recovery (EOR) market has been growing on account of increasing global energy demand. Increasing number of mature oil wells and high productivity levels achievable by using EOR techniques, are some of the major factors on account of which the global market for EOR is expected to grow during 2015 - 2020. Moreover, market growth is expected to be majorly concentrated in North America, South America and Europe through 2020.
