
Description: This industry offers a 10-year forecast of the global respiratory inhaler devices market between 2015 and 2025. In terms of value, the market is expected to register a CAGR of 4.3% during the projected period. This study demonstrates market dynamics and trends in all seven regions that influence the current environment and future status of the respiratory inhaler devices market over the forecast period.

Report Description

This report examines the respiratory inhaler devices market for the period 2015–2025. The primary objective of the report is to offer insights into developments in the respiratory inhaler devices market that are significantly transforming global businesses and enterprises. Increasing prevalence of asthma, COPD and other respiratory diseases coupled with rising awareness is predicted to increase usages of respiratory inhaler devices worldwide. This is expected to bolster growth of the respiratory inhaler devices market over the next five to six years. Increasing demand for inhalation respiratory inhaler devices for controlling asthma and other respiratory disease, especially among children and elderly population, is expected to drive growth of respiratory inhaler devices market during the forecast period. Companies are focusing on regions and sections where prevalence of asthma, and chronic lung disease are increasing such as Asia Pacific and MEA.

The respiratory inhaler devices market report begins with an overview of the respiratory inhaler devices market in terms of value. This section includes analysis of key trends, drivers and restraints and opportunity, which are factors influencing growth of the respiratory inhaler devices market. Impact analysis of key growth drivers and restraints based on the weighted average model is included in the respiratory inhaler devices market report to better equip clients with crystal clear decision-making insights.

The global respiratory inhaler devices market is segmented on the basis of products type into dry powder inhaler (DPI), metered dose inhaler (MDI) and nebuliser. Nebuliser is further sub-segmented into compressed air nebuliser, ultrasonic nebuliser and mesh nebuliser. A detailed analysis has been provided for every segment and sub-segment in terms of market size, Y-o-Y growth rate, absolute $ opportunity and BPS analysis.

The next section of the report highlights respiratory inhaler devices adoption by region. It provides a market outlook for 2015–2025 and sets the forecast within the context of the respiratory inhaler devices market. The study discusses key regional trends contributing to growth of the respiratory inhaler devices market worldwide, as well as analyses the extent to which drivers are influencing this market in each region. Key regions assessed in this report include North America, Latin America, Western Europe, Eastern Europe, Asia Pacific Excluding Japan (APEJ), Japan and Middle East & Africa.

The above sections – by product type and region – evaluate the present scenario and growth prospects of the respiratory inhaler devices market for the period 2015 –2025. We have considered 2014 as the base year and provide data for the forecast period.

To ascertain respiratory inhaler devices market size, we have also considered revenue generated by manufacturers. The forecast presented here assesses the total revenue by value across the respiratory inhaler devices market. In order to offer an accurate forecast, we started by sizing the current market, which forms the basis of how the respiratory inhaler devices market is expected to develop in the future. Given the characteristics of the market, we triangulated the outcome of three different types of analysis, based on supply side, downstream industry demand and the economic envelope.

In addition, it is imperative to note that in an ever-fluctuating global economy, we not only conduct forecasts in terms of CAGR, but also analyse on the basis of key parameters such as year-on-year (Y-o-Y) growth rates to understand the predictability of the market and to identify the right opportunities across the respiratory inhaler devices market.

The respiratory inhaler devices segments in terms of product and regions are analysed in terms of Basis Point Share (BPS) to understand individual segment's relative contributions to market growth. This detailed
level of information is important for identification of various key trends in the respiratory inhaler devices market.

Another key feature of this report is the analysis of key segments in terms of absolute dollar opportunity. This is traditionally overlooked while forecasting the market. However, absolute dollar opportunity is critical for assessing the level of opportunity that a provider can look to achieve, as well as to identify potential resources from a sales and delivery perspective of the respiratory inhaler devices market.

To understand key growth segments in terms of growth and adoption for dry powder inhaler, metered dose inhaler and nebuliser across the globe in the near future, this industry developed the respiratory inhaler devices market ‘Attractiveness Index’. The resulting index should help providers identify real market opportunities.

In the final section of the report, respiratory inhaler devices ‘Competitive Landscape’ is included to provide report audiences with a dashboard view, based on categories of providers in the value chain of the respiratory inhaler devices product portfolio and key differentiators. Key categories of providers covered in the report are respiratory inhaler devices manufacturers. This section is primarily designed to provide clients with an objective and detailed comparative assessment of key providers specific to a market segment in the respiratory inhaler devices value chain and the potential players for the same. Report audiences can gain segment-specific vendor insights to identify and evaluate key competitors based on in-depth assessment of capabilities and successes in respiratory inhaler devices marketplace.

Detailed profiles of the providers are also included in the scope of the report to evaluate their long-term and short-term strategies, key offerings and recent developments in the respiratory inhaler devices market. Key competitors covered in terms of manufacturers include AstraZeneca, Beximco Pharmaceuticals Ltd., Boehringer Ingelheim GmbH, Cipla Ltd., GlaxoSmithKline plc, Koninklijke Philips N.V., Merck & Co., Inc., OMRON Healthcare Europe B.V., PARI Medical Holding and Teva Pharmaceutical Industries Ltd.

Key Segments Covered

Product Type
Dry Powder Inhaler
Metered Dose Inhaler
Nebulizer
Ultrasonic Nebulizer
Compressed Air Nebulizer
Mesh Nebulizer
By Disease Indication
Asthma
