Global Industry Insight: Clinical Nutrition Market Size, Share, Development, Growth and Demand Forecast to 2020

Description: With the increasing geriatric population, the clinical nutrition spends are expected to increase in the future. Due to the frail digestive framework at an old age, it becomes troublesome for human body to assimilate all the required nutrients from food. The loss of appetite is considered as a major widespread issue among the geriatric population, due to which, they do not get essential amount of nutrients.

Therefore, to get adequate supplements, the reliance of the geriatric population towards clinical nutrition support is increasing. The worldwide clinical nutrition business sector is growing because of high birth rate, increase in number of victims receiving malnutrition treatment, and high number of premature births.

On the basis of product, the global clinical nutrition market has been segmented into infant nutrition, enteral nutrition and parenteral nutrition. The various infant nutrition types include milk-based, soy-based, organic, probiotic / prebiotic and others. Enteral nutrition can be segmented into two types includes standard and enteral nutrition for chronic illness. The various parenteral nutrition types include amino acids, dextrose, fats and additives. Infant nutrition is the largest product segment in the global clinical nutrition market. In order to achieve optimal growth and development, it is recommended that infants should be breastfed for the first six month of birth. Also, it is necessary to provide an infant with the optimal amount of nutrients, which are necessary during the first three years of a baby's life for proper health and wellbeing. The infant nutrition products are required to meet these nutritional requirements. During the initial phase of an infant's life, any deficit can lead to developmental retardation, growth retardation, and increased risk of infection, blindness, and anemia. The importance of providing infant nutrition increases manifold in the premature birth cases. Generally, nations with high birth rate are expected to witness more incidents of premature births. Health-wise, premature birth usually leads to long-term adverse consequences. Prematurely born children are at a greater risk to fall victim to sensory deficit, cerebral palsy, learning disabilities, and respiratory illnesses, as compared to children born at the end of a normal term. When mothers are not able to/choose not to breastfeed their babies, due to illness or other reasons, infant formulas make for suitable alternatives. Infant formula products are widely available at supermarkets and through other retail channels.

Enteral nutrition is a type of nourishment that is transmitted specifically into the digestive arrangement of a person, in form of fluid. Tube feeding is the most widely recognized type of enteral nutrition. Tube feeding can be given to individuals, who are not ready to meet their wholesome needs, with food and beverages, and are not vulnerable to go through uncontrollable vomiting, or looseness of the bowels.

Parenteral nutrition can be given to those patients whose daily nutritional requirement cannot be met through the normal digestive pathway, while they are not able to eat, digest and consume nutrients. Parenteral nutrition refers to intravenous feeding and delivery of nutrients in form of a solution that is directly infused into the bloodstream, through a special catheter and tubing.

The global clinical nutrition market was valued at $39,339.4 million in 2015, and it is expected to grow at a CAGR of 5.4% during 2016-2022. The increasing geriatric population, high birth rate and high number of premature birth, surge in the number of victims of malnutrition receiving treatment, escalating incidence of lifestyle associated disease, and increasing incidence of cancer and central nervous system diseases are driving the growth of the clinical nutrition market.

Asia-Pacific accounted for the largest share (40.4%) in the global clinical nutrition market. The region is anticipated to witness rapid growth during the forecast period. The increasing birth rate, along with growing geriatric population and high number of people with malnutrition is driving the growth of the clinical nutrition market in the region.

1. Research Scope & Methodology
   1.1 Market Definition
   1.2 Market Scope
   1.2.1 Market breakdown by product
   1.2.2 Market breakdown by geography
   1.3 Research Methodology and Sources

2. Executive Summary
   2.1 Key Findings
   2.2 Research Summary

3. Market Outlook
   3.1 Introduction
   3.2 Trends in the Clinical Nutrition Market
   3.2.1 Increasing homecare usage of nutritional products
   3.2.2 Shift from parenteral nutrition to enteral nutrition
   3.3 Opportunities in the Clinical Nutrition Market
   3.3.1 Increasing demand for clinical nutrition in emerging economies
   3.3.2 Increasing demand for clinical nutrition in infant category
   3.4 Factors Driving the Growth of Market and its Impact on Market Forecast
   3.4.1 Increasing geriatric population
   3.4.2 High birth rate and high number of premature birth
   3.4.3 Surge in the number of victims of malnutrition receiving treatment
   3.4.4 Surging incidence of lifestyle associated diseases
   3.4.5 Increasing incidence of cancer and central nervous system diseases
   3.4.6 Impact analysis of drivers on market forecast
   3.5 Factors Hindering the Growth of Market and its Impact on Market Forecast
   3.5.1 Lack of awareness
   3.5.2 Stringent regulations and reimbursement issues
   3.5.3 Impact analysis of restraints on market forecast

   4.1 Global Clinical Nutrition Market, by Product
      4.1.1 Infant nutrition
      4.1.2 Enteral nutrition
      4.1.3 Parenteral nutrition
   4.2 Global Clinical Nutrition Market, by Region

5. Global Clinical Nutrition Market, by Product
   5.1 Global Infant Nutrition Market
      5.1.1 Global Infant Nutrition Market, by product
         5.1.1.1 Milk-based
         5.1.1.2 Soy-based
         5.1.1.3 Organic
         5.1.1.4 Probiotic / prebiotic
      5.1.2 Global Infant Nutrition Market, by region
   5.2 Global Enteral Nutrition Market
      5.2.1 Global enteral nutrition market, by product
         5.2.1.1 Standard enteral nutrition
         5.2.1.2 Enteral nutrition for chronic illness
      5.2.2 Global enteral nutrition market, by region
   5.3 Global Parenteral Nutrition Market
      5.3.1 Global parenteral nutrition market, by product
         5.3.1.1 Amino acids
         5.3.1.2 Dextrose
         5.3.1.3 Fats
         5.3.1.4 Additives
      5.3.2 Global parenteral nutrition market, by region

6. Global Clinical Nutrition Market, by Geography
   6.1 North America Clinical Nutrition Market
      6.1.1 North America clinical nutrition market, by product
         6.1.1.1 North America infant nutrition market, by product
6.1 North America Clinical Nutrition Market
6.1.1 North America enteral nutrition market, by product
6.1.1.2 North America parenteral nutrition market, by product
6.1.2 North America clinical nutrition market, by country
6.1.2.1 The U.S. clinical nutrition market, by product
6.1.2.2 Mexico clinical nutrition market, by product
6.2 Europe Clinical Nutrition Market
6.2.1 Europe clinical nutrition market, by product
6.2.1.1 Europe infant nutrition market, by product
6.2.1.2 Europe enteral nutrition market, by product
6.2.1.3 Europe parenteral nutrition market, by product
6.2.2 Europe clinical nutrition market, by country
6.2.2.1 Germany clinical nutrition market, by product
6.2.2.2 The U.K. clinical nutrition market, by product
6.2.2.3 France clinical nutrition market, by product
6.3 Asia-Pacific Clinical Nutrition Market
6.3.1 Asia-Pacific clinical nutrition market, by product
6.3.1.1 Asia-Pacific infant nutrition market, by product
6.3.1.2 Asia-Pacific enteral nutrition market, by product
6.3.1.3 Asia-Pacific parenteral nutrition market, by product
6.3.2 Asia-Pacific clinical nutrition market, by country
6.3.2.1 China clinical nutrition market, by product
6.3.2.2 Japan clinical nutrition market, by product
6.3.2.3 India clinical nutrition market, by product
6.3.2.4 Indonesia clinical nutrition market, by product
6.4 South America Clinical Nutrition Market
6.4.1 South America clinical nutrition market, by product
6.4.1.1 South America infant nutrition market, by product
6.4.1.2 South America enteral nutrition market, by product
6.4.1.3 South America parenteral nutrition market, by product
6.4.2 South America clinical nutrition market, by country
6.4.2.1 Brazil clinical nutrition market, by product
6.5 Middle East and Africa (MEA) Clinical Nutrition Market
6.5.1 MEA clinical nutrition market, by product
6.5.1.1 MEA infant nutrition market, by product
6.5.1.2 MEA enteral nutrition market, by product
6.5.1.3 MEA parenteral nutrition market, by product
6.5.2 MEA clinical nutrition market, by country
6.5.2.1 South Africa clinical nutrition market, by product
6.5.2.2 Saudi Arabia clinical nutrition market, by product

7. Competitive Analysis
7.1 Porter's Five Forces of Competitive Position Analysis
7.1.1 Bargaining power of buyers
7.1.2 Bargaining power of suppliers
7.1.3 Threat of new entrants
7.1.4 Intensity of rivalry
7.1.5 Threat of substitutes
7.2 Market Share Analysis of Key Players

8. Company Profiles and Strategic Developments
8.1 Key Company Profiles
8.1.1 Baxter International, Inc.
8.1.1.1 Business overview
8.1.1.2 Product and service offerings
8.1.2 Abbott Laboratories
8.1.2.1 Business overview
8.1.2.2 Product and service offerings
8.1.3 B. Braun Melsungen AG
8.1.3.1 Business overview
8.1.3.2 Product and service offerings
8.1.4 Nestlé S.A.
8.1.4.1 Business overview
8.1.4.2 Product and service offerings
8.1.5 Groupe Danone
8.1.5.1 Business overview
8.1.5.2 Product and service offerings
8.1.6 Mead Johnson Nutrition Company
8.1.6.1 Business overview
8.1.6.2 Product and service offerings
8.1.7 Fresenius Kabi AG
8.1.7.1 Business overview
8.1.7.2 Product and service offerings
8.1.8 Perrigo Company Plc
8.1.8.1 Business overview
8.1.8.2 Product and service offerings
8.2 Strategic Developments in the Global Clinical Nutrition Market
8.2.1 Mergers and acquisitions
8.2.2 Product launches
8.2.3 Partnerships/ collaborations
8.2.4 Investment
8.2.5 Others
