Foot Orthotic Insoles Market Analysis: By Type (Custom, Prefabricated); By End User (Sports (Running, Court); Medical (Diabetes, Rheumatoid Arthritis, Plantar Fasciitis, Metatarsalgia, Obesity); Comfort) -With Forecast (2015 - 2020)

Description:
Foot orthotic insoles are employed to correct the abnormalities associated with the foot. Foot orthotic insoles work by altering the biomechanics of the foot. The rise in geriatric population over the globe and also lifestyle diseases such as obesity, diabetes are the driving factors in this market. The market can be broadly classified into prefabricated and custom foot insoles. Custom Foot Insoles or bespoke foot insoles are prescribed by Podiatrist, Orthotist, Pedorthist, Orthopedist, Chiropractor, or any other health professional with a background in biomechanics, in order to stabilize and correct biomechanical misalignment of the feet and lower limbs. They offer comfortable and functional insole to the customer that improves foot function by accommodating and controlling excessive motion during gait.

The foot orthotic insoles are set to grow at a fast pace, particularly in the APAC region, owing to rise in prevalence of chronic diseases, disposable income as well as increasing awareness about foot orthotic insoles. The Americas and Europe regions are comparatively mature and have an established customer base owing to the rising awareness towards personal healthcare and technological advancements. The market is currently dominated by North America which accounted for about half of the global share. APAC is a promising market and is opening gateways for new manufacturers.
