Description: Juice is essentially the liquid extract of fruit or vegetable. Juices are mainly consumed for their health benefits. Fruits are the major source for juices and are often sold in the form of packaged and canned beverages. Juices are available in various flavors reflecting the source of the extract such as Orange pulp, Apple, Lemonade and so on. In nectars and juice drinks, along with the juice concentrate manufacturers add sweeteners, citric acids and other ingredients to enhance taste, color and nutritional content. Packaged Juice products can be either frozen or non-refrigerated. The report on juice market covers packaged juice products which are available in the form of cartons, glass & plastic bottles and so on.
