Generic Oncology Drug Manufacturing Plant Project Report: Industry Trends, Manufacturing Process, Machinery, Raw Materials, Cost and Revenue

Description: Driven by rising cancer incidences, patent expiry of a number of blockbuster oncology drugs and the high cost of cancer treatment, the market for generic oncology drugs has been witnessing robust growth. Apart from their strong growth, these drugs also enjoy high product differentiation and entry barriers. As a result, competitive intensity in this segment is also relatively low. This has enabled manufacturer to enjoy higher pricing power and margins compared to commoditised generics.
