Description:
Lactic Acid Market by Application (Biodegradable Polymer, Food & Beverage, Personal Care & Pharmaceutical) & Polylactic Acid Market by Application (Packaging, Agriculture, Automobile, Electronics, Textile), & by Geography - Global Trends & Forecasts to 2020.

Lactic acid is a bulk chemical or commodity chemical that has been witnessing strong market growth. It is commercially produced through the fermentation of glucose that is derived from plant starch. There are four main applications and uses of lactic acid: biodegradable polymers, food & beverages, personal care products (cosmetics), and pharmaceuticals. In the last few years, the use of lactic acid in biodegradable polymers has been growing significantly, mainly because of the increased consumption of products from natural sources. Emerging application possibilities in the personal care and pharmaceuticals industries are projected to increase the demand significantly in the coming years. The polylactic acid market is also witnessing a high growth, owing to increasing awareness among consumers and plastic manufacturers regarding the environment, coupled with support from government legislations and increasing landfill waste in various regions.

This report is a detailed study of different regions and their market sizes, along with an analysis of the lactic acid and polylactic acid market by application. It includes profiles and competitive positions of the top market players in the business, such as BASF SE (Germany), CSM N.V. (The Netherlands), The Dow Chemical Company (U.S.), Teijin Ltd.
