Retailing in South Africa - Market Summary and Forecasts; Comprehensive overview of the market, consumer, and competitive context, with retail sales value and forecasts to 2019

Description:
South Africa's retail sector is expected to witness robust growth over the next five years backed by steady economic growth, stable inflation, favorable policies, and improving macroeconomic factors. The increasing penetration of the internet and mobile devices is fueling the growth of sales through the online channel, and the trend is expected to gain further traction over the next five years.

Key Findings
- Food and grocery is the largest sector, accounting for 54.8% of the overall retail sales in 2014
- Demand for private labels is on the rise
- M-commerce is witnessing robust growth backed by increased adoption of smartphones
- Growth in the tourism sector to boost retail spending

Synopsis
"Retailing in South Africa - Market Summary and Forecasts, 2014-2019" provides data for historic and forecast retail sales, and also includes information on the business environment and country risk related to the South Africa retail environment.
