The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market. Essential resource for top-line data and analysis covering the Japan software & services market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

Highlights

- The software and services market consists of two separate segments. The software segment includes systems and application software. The IT services segment includes IT outsourcing & processing, IT consulting & support, and cloud computing. Market value figures are assessed at manufacturer selling price (MSP), based on revenues accrued from software sales, licenses and IT services agreements. Any currency conversions used in the creation of this report have been calculated using constant 2014 annual average exchange rates.

- The Japanese software & services industry group had total revenues of $73.3bn in 2015, representing a compound annual growth rate (CAGR) of 1.3% between 2011 and 2015.

- The IT services segment was the industry group's most lucrative in 2015, with total revenues of $50.4bn, equivalent to 68.7% of the industry group's overall value.

- The most recent Global Unlicensed Software Study, published by the Business Software Alliance in 2013, estimates that the piracy rate in the Asia-Pacific region is around 62% compared to 60% in 2012. Japan has less of a problem with piracy than other countries in the region, with a rate of 19% in 2013.
