Modern Assembly Language Programming with the ARM Processor

Description: Modern Assembly Language Programming with the ARM Processor carefully explains the concepts of assembly language programming, slowly building from simple examples towards complex programming on bare-metal embedded systems. Considerable emphasis is put on showing how to develop good, structured assembly code.

More advanced topics, such as fixed and floating point mathematics, optimization, and the ARM VFP and NEON extensions are also covered, helping users understand representations of, and arithmetic operations on, integral and real numbers in any base, gain a basic understanding of processor architectures and instruction sets, write ARM assembly language programs, quickly learn any new assembly language, implement the procedures and mechanisms for handling interrupt processing and performing, interface assembly language with high-level languages such as C/C++, and explore ethical issues involving safety-critical applications.

- Concepts are illustrated and reinforced with a large number of tested and debugged assembly and C source listing
- Intended for use on very low-cost platforms, such as the Raspberry Pi or pcDuino, but with the support of a full Linux operating system and development tools
- Includes discussions of advanced topics, such as fixed and floating point mathematics, optimization, and the ARM VFP and NEON extensions

Contents:

1. Introduction
2. GNU Assembly Syntax
3. Load/Store and Branch Instructions
4. Data Processing and Other Instructions
5. Structured Programming
6. Abstract Data Types
7. Integer Mathematics
8. Non-Integral Mathematics
9. The ARM Vector Floating Point Coprocessor
10. The ARM NEON Extensions
11. Devices
12. Pulse Modulation
13. Common System Devices
14. Running Without an Operating System
Index

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Modern Assembly Language Programming with the ARM Processor
Web Address: http://www.researchandmarkets.com/reports/3515805/
Office Code: SCBRIQIT

Product Format
Please select the product format and quantity you require:

<table>
<thead>
<tr>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hard Copy (Hard Back)</td>
</tr>
<tr>
<td>USD 67 + USD 29 Shipping/Handling</td>
</tr>
</tbody>
</table>

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: Mr ☐ Mrs ☐ Dr ☐ Miss ☐ Ms ☐ Prof ☐
First Name: ____________________________ Last Name: ____________________________
Email Address: * ____________________________
Job Title: ____________________________
Organisation: ____________________________
Address: ____________________________
City: ____________________________
Postal / Zip Code: ____________________________
Country: ____________________________
Phone Number: ____________________________
Fax Number: ____________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
