
Description: The global bio-implants market is driven by various factors which include global rise in adoption of bio-implants, increase in number of people suffering from disabilities. It is giving rise to higher number of amputation. Rising incidence and prevalence rate of CVD, CHD and other heart diseases is also driving the market growth. Additionally, with increasing adoption of prosthetic limbs across geographies and rise in awareness about ear implants, pacemakers and other bio-implants are creating huge scope for global bio-implant market.

Market is segmented on the basis of materials which include material such as ceramics, metal, alloys, polymers and others. Global bio-implant market by material and its type are extensively adopted by major hospitals and clinics for bio-implants. Further the market is segmented on the basis of bio implants type which includes CVD implants, spinal implants, orthopedic and trauma, dental, ophthalmic and neurostimulators. Stents, cardiac implant, ear implant are expected to contribute highest among all the segments of global bio-implant market. With the advancement in technology and innovation due to research and development segments such as dental implants, orthopedic implants are expected to contribute better in next few years.

In terms of geographical segmentation, North America is expected to lead the revenue in this market due to higher adoption of bio-implants such as cochlear implant, prosthetic implants, stents and so on followed by Europe. Asia Pacific market is expected to have the highest market growth. It is driven by growing awareness, rise in number of local manufacturers providing cheaper implants, availability of raw materials such as ceramics, metal and alloys in abundance and growing R&D.
