A Study of the MENA & India Elevator Market 2015

Description: It is expected that the MENA region will witness installation of close to 700,000 new elevator units by 2018. High growth in the elevator market is expected from new construction in Middle East with sustained elevator demand in Dubai and Abu Dhabi new demand emerging from Jeddah. Even though Africa does not have many skyscrapers currently, and demand is primarily for elevator repair and maintenance, with the government acutely aware that poor infrastructure is the biggest obstacle to growth, elevator demand is expected to rise. Kenya is emerging as a key market for elevators due to rapid urbanisation and population growth coupled with expansion of the middle class.

In India with the government’s drive for infrastructure, rising urbanization and the increasing number of high rise building, the elevator industry is headed for robust growth. Over the next decade, 100 smart cities, several new airports and metro rail routes are expected to be commissioned in India. The elevator market size in India was approximately 52,600 units in 2013 and is projected to grow to more than 100,000 by 2018. The highest demand in the country is currently from the Western Region followed by North & South.
