Chemotherapy Induced Pain-Pipeline Insights, 2016

Description:
“Chemotherapy Induced Pain-Pipeline Insights, 2016” provides in depth insight on the pipeline drugs and their development activities around the Chemotherapy Induced Pain. The report covers the product profiles in various stages of development including Discovery, Pre-clinical, IND, Phase I, Phase II, Phase III and Preregistration. The Report covers the product clinical trials information and other development activities including technology, licensing, collaboration, acquisitions, funding, patent and USFDA & EMA designations details. The Report also provides detailed information on the discontinued and dormant drugs that have gone inactive over the years for Chemotherapy Induced Pain. The report also assesses the Chemotherapy Induced Pain therapeutics by Monotherapy, Combination products, Molecule type and Route of Administration.

Scope
- The report provides competitive pipeline landscape of Chemotherapy Induced Pain
- The report provides pipeline products under drug profile section which includes product description, MOA, licensors & collaborators, development partner and chemical information
- Coverage of the Chemotherapy Induced Pain pipeline on the basis of target, MOA, route of administration, technology involved and molecule type
- The report review the key players involved in the therapeutics development for Chemotherapy Induced Pain and also provides company profiling
- The report also gives the information on dormant and discontinued pipeline projects
- Pipeline products coverage based on various stages of development ranging from pre registration till discovery and undisclosed stages
- Provides pipeline assessment by monotherapy and combination therapy products, stage of development and molecule type

Reasons to buy
- Complete Pipeline intelligence and complete understanding over therapeutic development for Chemotherapy Induced Pain
- Identify the relationship between the drugs and its use for target finding, drug repurposing, and precision medicine.
- Devise corrective measure for pipeline projects by understanding Chemotherapy Induced Pain pipeline depth and focus of Indication therapeutics
- Developing strategic initiatives to support your drug development activities.
- Optimizing the portfolio and keep in touch with the rapid changing pharmaceutical market, and make the best decision for your business.
- Develop and design in licensing and out licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
- Provides strategically significant competitor information, analysis, and insight to formulate effective R&D development strategies
- Modify the therapeutic portfolio by identifying discontinued projects and understanding the factors that drove them from pipeline
- Gaining a clear picture of the competitive landscape for evidence based decisions
