The Report also provides detailed information on the discontinued and dormant drugs that have gone inactive over the years for Polymyositis. The report also assesses the Polymyositis therapeutics by Monotherapy, Combination products, Molecule type and Route of Administration.

Scope
- The report provides competitive pipeline landscape of Polymyositis
- The report provides pipeline products under drug profile section which includes product description, MOA, licensors & collaborators, development partner and chemical information
- Coverage of the Polymyositis pipeline on the basis of target, MOA, route of administration, technology involved and molecule type
- The report review the key players involved in the therapeutics development for Polymyositis and also provides company profiling
- The report also gives the information on dormant and discontinued pipeline projects
- Pipeline products coverage based on various stages of development ranging from pre registration till discovery and undisclosed stages
- Provides pipeline assessment by monotherapy and combination therapy products, stage of development and molecule type

Reasons to buy
- Complete Pipeline intelligence and complete understanding over therapeutic development for Polymyositis
- Identify the relationship between the drugs and its use for target finding, drug repurposing, and precision medicine.
- Devise corrective measure for pipeline projects by understanding Polymyositis pipeline depth and focus of indication therapeutics
- Developing strategic initiatives to support your drug development activities.
- Optimizing the portfolio and keep in touch with the rapid changing pharmaceutical market, and make the best decision for your business.
