Select COX-2 Inhibitors -Pipeline Insights, 2016

Description:

SUMMARY
The report, "Selective COX-2 Inhibitors-Pipeline Insights, 2016" provides in depth insights on the pipeline drugs and their development activities around the Selective COX-2 Inhibitors. The report covers the product profiles in various stages of development including Discovery, Pre-clinical, IND, Phase I, Phase II, Phase III and Preregistration. Report covers the product clinical trials information and other development activities including technology, licensing, collaborations, acquisitions, fundings, patent and USFDA & EMA designations details. The report Report also provides detailed information on the discontinued and dormant drugs that have gone inactive over the years for Selective COX-2 Inhibitors. The report Report also assesses the Selective COX-2 Inhibitors therapeutics by Monotherapy, Combination products, molecule type and Route of Administration.

Please note: This report requires certain updates. We have all the information available but require 3 business days to complete the process and ensure it is as up-to-date as possible. Certain sections in the report may be removed or altered based on the availability and relevance of data for the indicated indication.

Scope
- The report provides competitive pipeline landscape of Selective COX-2 Inhibitors
- The report provides pipeline products under drug profile section which includes product description, MOA, licensors & collaborators, development partner and chemical information
- Coverage of the Selective COX-2 Inhibitors pipeline on the basis of target, MOA, route of administration, technology involved and molecule type

- The report reviews key players involved in the therapeutics development for Selective COX-2 Inhibitors and also provide company profiling
- The report also gives the information of dormant and discontinued pipeline projects
- Pipeline products coverage based on various stages of development ranging from preregistration till discovery and undisclosed stages
- Provides pipeline assessment by monotherapy and combination therapy products, stage of development and molecule type

Reasons to buy
- Complete MOA intelligence and complete understanding over therapeutics development for Selective COX-2 Inhibitors
- Identify the relationship between the drugs and use it for target finding, drug repurposing, and precision medicine.
- Devise corrective measures for pipeline projects by understanding Selective COX-2 Inhibitors pipeline depth and focus of Indication therapeutics
- Developing strategic initiatives to support your drug development activities.
- Optimize your portfolio and keep you in touch with the rapidly changing pharmaceutical markets, and make the best decisions for your business.
- Develop and design in licensing and out licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
- Provides strategically significant competitor information, analysis, and insights to formulate effective R&D development strategies
- Modify the therapeutic portfolio by identifying discontinued projects and understanding the factors that drove them from pipeline
- Gaining a Full Picture of the Competitive Landscape for Evidencebased Decisions
