Soluble Guanylate Cyclase (sGC) Activators -Pipeline Insights, 2016

Description:

The report, "Soluble Guanylate Cyclase (sGC) Activators-Pipeline Insights, 2016" provides in depth insights on the pipeline drugs and their development activities around the Soluble Guanylate Cyclase (sGC) Activators. The report covers the product profiles in various stages of development including Discovery, Pre-clinical, IND, Phase I, Phase II, Phase III and Preregistration. Report covers the product clinical trials information and other development activities including technology, licensing, collaborations, acquisitions, fundings, patent and USFDA & EMA designations details. The report also provides detailed information on the discontinued and dormant drugs that have gone inactive over the years for Soluble Guanylate Cyclase (sGC) Activators. The report also assesses the Soluble Guanylate Cyclase (sGC) Activators therapeutics by Monotherapy, Combination products, molecule type and Route of Administration.

Please note: This report requires certain updates. We have all the information available but require 3 business days to complete the process and ensure it is as up-to-date as possible. Certain sections in the report may be removed or altered based on the availability and relevance of data for the indicated indication.

Scope
- The report provides competitive pipeline landscape of Soluble Guanylate Cyclase (sGC) Activators
- The report provides pipeline products under drug profile section which includes product description, MOA, licensors & collaborators, development partner and chemical information
- Coverage of the Soluble Guanylate Cyclase (sGC) Activators pipeline on the basis of target, MOA, route of administration, technology involved and molecule type
- The report reviews key players involved in the therapeutics development for Soluble Guanylate Cyclase (sGC) Activators and also provide company profiling
- The report also gives the information of dormant and discontinued pipeline projects
- Pipeline products coverage based on various stages of development ranging from preregistration till discovery and undisclosed stages
- Provides pipeline assessment by monotherapy and combination therapy products, stage of development and molecule type

Reasons to buy
- Complete MOA intelligence and complete understanding over therapeutics development for Soluble Guanylate Cyclase (sGC) Activators
- Identify the relationship between the drugs and use it for target finding, drug repurposing, and precision medicine.
- Devise corrective measures for pipeline projects by understanding Soluble Guanylate Cyclase (sGC) Activators pipeline depth and focus of Indication therapeutics
- Developing strategic initiatives to support your drug development activities.
- Optimize your portfolio and keep you in touch with the rapidly changing pharmaceutical markets, and make the best decisions for your business.
- Develop and design in licensing and out licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
- Provides strategically significant competitor information, analysis, and insights to formulate effective R&D development strategies
- Modify the therapeutic portfolio by identifying discontinued projects and understanding the factors that drove them from pipeline
- Gaining a Full Picture of the Competitive Landscape for Evidencebased Decisions
