Liquid Applied Membranes Market - by Type (Elastomeric, Bituminous, and Cementitious), by End-Use Industry (Residential Construction, Commercial Construction, and Public Infrastructure) and by Region - Global Forecast To 2020

Description:
In this study, 2013 has been considered as the historical year and 2014 as the base year for estimating market size of liquid applied membranes. The report aims at estimating the market size and future growth potential of liquid applied membranes market across different segments such as type, end-use industry, and region. The base year considered for the study is 2014 and the market size is forecasted from 2015 to 2020.

In the secondary research process, different sources have been referred to identify and collect information for this study. These secondary sources include annual reports, press releases, and investor presentations of companies, white papers, and certified publications, articles from recognized authors. In the primary research process, sources from both supply and demand sides have been interviewed to obtain qualitative and quantitative information for this report.

The bottom-up and top-down approach has been used to estimate market size of liquid applied membranes by type, by end-use industry and by region, in terms of value. The top-down approach has been implemented to validate the market size, in terms of value. With the data triangulation procedure and validation of data through primaries, the exact values of the overall parent market size and individual market sizes have been determined and confirmed in this study.

There are various raw materials which are used for the production of liquid applied membranes, such as polyurethane, acrylic, PMMA, and polyurea, bitumen, additives, reinforcement, plasticizers, and other special chemicals. The raw materials are generally sourced from the various raw material suppliers and are then further processed by various processes such as extrusion, calendaring and other processes to get the required liquid applied membranes product.

This study answers several questions for the stakeholders, primarily which market segments to focus in next two to five years for prioritizing the efforts and investments. These stakeholders include liquid applied membrane manufacturers.
