Global Defense Counter-IED Systems Market 2016-2020

Description: About Defense Counter IED Systems

A counter improvised explosive device (C-IED) is an essential piece of equipment in battlefield operations. Battle tanks and mine-resistant and lightweight vehicles are some of the key systems to counter improvised explosive device (IED) threats. Modern-day warfare has also emphasized the use of electronic jammers and detection systems to prevent and locate explosives hidden under the ground.

Unmanned systems (i.e., unmanned ground vehicle, unmanned aerial vehicle (UAV), and unmanned underwater vehicle) have gained immense popularity to counter these IED attacks. These aid the troops by collecting information and providing high-definition imagery of IEDs even in dense areas.

Analysts forecast the global defense counter IED systems to grow at a CAGR of 1.51% during the period 2016 -2020.
