Global Nail Care Market 2015-2019

Description: Market analysis of the nail care market

Market research analysts predict the global nail care market to reach a market value of around USD 9 billion by the end of 2019. The rising demand for nail polish among the younger population is one of the primary drivers of the market. Around 91% of girls between the age of nine and seventeen use some form of nail products, making it one of the most popular cosmetic item among teenage girls. Fashion trend such as nail art is also transforming a nail into a stylish accessory.

The side effects of the chemicals incorporated in the nail care products are expected to pose challenges for the growth of the market. For instance, formaldehyde resin causes dermatitis. Camphor, another chemical used in nail care products can cause nausea, dizziness, and headaches when inhaled, especially in large doses for nail technicians.
