Global Antimony Market - Segmented by Product Type, By Application, and Geography - Trends and Forecasts (2016-2020)

Description: The Global Antimony Market has been estimated at 239.62 kilotons in 2015 and is projected to reach XX.XX kilotons by 2020, at a CAGR of below 5.00% during the forecast period from 2015 to 2020. The market witnessed an estimated year on year growth of 4.12% from 2014 to 2015. In the report, the global antimony market size includes the metalloid consumption in all its commercially used forms, including metal ingot, antimony alloys, antimony trioxide, antimony pentoxide, and others. Antimony, a toxic chemical element, is generally classified as a metalloid and has been known to humans for around 4000 years. Antimony, owing to its high reactivity towards sulphur, copper, and other elements present in the earth's crust, is found in its elemental form in very small quantities. Most of the metalloid is extracted from ores, valentinite and stibnite, while relatively lower quantities are currently being produced through recycling old products containing antimony, mostly lead batteries and antimony alloy-based products. The majority of global antimony reserves and production is in China, resulting in ample availability, and consequently the country being the major consumer in the global antimony market in 2015.

Antimony, owing to its poisonous nature and demand-supply imbalance, is used in small quantities in various applications in major commercial and industrial sectors, including transportation, plastics, glass, clothing, consumer goods and toys etc. In the antimony market report, we have taken the following major application segments into consideration: Flame Retardant Synergist, Lead Acid Batteries, Alloy Strengthening Agent, Fiberglass Composites, Catalyst, and Others. The flame retardant synergist application segment is expected to account for 50.00% share of the global antimony market in 2015.

This market is driven by a number of factors, such as growing demand for flame retardant products, increasing imports by china, and demand from PET manufacturers. However, this market faces certain drawbacks, such as antimony supply and demand imbalance and dwindling antimony prices. These factors may act as a roadblock to the growth of the market.

The market has also been geographically segmented based on consumption and production. In terms of production, the report focuses on the following major countries: Australia, Bolivia, China, Mexico, Myanmar, Russia, South Africa, Tajikistan, and others. In terms of consumption, the market has been divided into Asia-Pacific, North America, South America, Europe, and Middle-East and Africa. The regions have further been divided into major consumer countries. In terms of both consumption and production, in 2015 China is estimated to lead the market with a share of XX.XX%. The stable price of antimony due to its highly available reserve (ingot, trioxide, and other compounds), combined with the restrictive antimony export policies enacted by the government, antimony consumption is increasing in China.

Furthermore, government crackdown on illegal antimony mining in China, increased mining outside the country, and growing popularity of antimony recovery from recycled products will offer numerous opportunities in the growth of the global antimony market. Currently, antimony is mostly being recycled from lead batteries, though the recent development of a process to extract the element from lamp phosphor waste has been developed in Belgium. Some of the major companies dominating this market are Beijing North Xinyuan Electrical Carbon Products Co., Huachang Antimony Industry, Hunan ChenZhou Mining Group Co., Mandalay Resources Corp., Recylex, Shanghai Metal Corporation, United States Antimony Corp., Village Main Reef Ltd. and Yunnan Muli Antimony Industry.

Key Deliverables in the Study

Market analysis for the global antimony market, with region specific assessments and competition analysis on global and regional scales
Market definition along with the identification of key drivers and restraints
Identification of factors instrumental in changing the market scenarios, rising prospective opportunities, and identification of key companies that can influence this market on a global and regional scale
Extensively researched competitive landscape section with profiles of major companies along with their market shares
Identification and analysis of the macro and micro factors that affect the Global Antimony market on both global and regional scales
A comprehensive list of key market players along with the analysis of their current strategic interests and key financial information

A wide-ranging knowledge and insights about the major players in this industry and the key strategies adopted by them to sustain and grow in the studied market

Insights on the major countries/regions in which this industry is blooming and identification of the regions that are still untapped

Please note: As this product is updated at the time of order, dispatch will be 72 hours from the date the order and full payment is received.

Contents:

1. Introduction
   1.1 Description
   1.2 Research Methodology
2. Executive Summary
3. Antimony Market
   3.1 Market Definition
   3.2 Industry Value Chain Analysis
   3.3 Industry Attractiveness - Porter's Five Forces Model
4. Global Supply and Demand Analysis
   4.1 Major Current and Planned Projects
   4.2 Trade Analysis
   4.3 Current Supply-Demand Scenario
   4.4 Production and Reserve Analysis (By Country)
      4.4.1 Australia
      4.4.2 Bolivia
      4.4.3 China
      4.4.4 Mexico
      4.4.5 Myanmar
      4.4.6 Russia
      4.4.7 South Africa
      4.4.8 Tajikistan
      4.4.9 Others
   4.5 Future Supply-Demand Scenario
5. Market Dynamics
   5.1 Drivers
5.1.1 Growing Demand for Flame Retardant Products
5.1.2 Increasing Imports by China
5.1.3 Demand from PET Manufacturers
5.2 Restraints
5.2.1 Supply and Demand Imbalance
5.2.2 Reducing Prices
5.2.3 Antimony Substitution in Major Applications
5.3 Opportunities
5.3.1 Government Crackdown on Illegal Mining in China
5.3.2 Increased Mining Outside China
5.3.3 Recovery of Antimony from Recycled Products
6. Market Segmentation and Analysis
6.1 By Product Type
6.1.1 Metal Ingot
6.1.2 Antimony Trioxide
6.1.3 Antimony Pentoxide
6.1.4 Alloys
6.1.5 Others
6.2 By Application
6.2.1 Flame Retardant Synergist
6.2.2 Lead Acid Batteries
6.2.3 Alloy Strengthening Agent
6.2.4 Fiberglass Composites
6.2.5 Catalyst
6.2.6 Others
7. Regional Consumption Analysis
7.1 Asia-Pacific
7.1.1 China
7.1.2 India
7.1.3 Japan
7.1.4 South Korea
7.1.5 Rest of Asia-Pacific
7.2 North America
7.2.1 United States
7.2.2 Canada
7.2.3 Mexico
7.2.4 Rest of North America
7.3 Europe
7.3.1 Germany
7.3.2 United Kingdom
7.3.3 Italy
7.3.4 France
7.3.5 Rest of Europe
7.4 South America
7.4.1 Brazil
7.4.2 Argentina
7.4.3 Rest of South America
7.5 Middle-East and Africa
7.5.1 Saudi Arabia
7.5.2 South Africa
7.5.3 Rest of MEA
8. Price Analysis
9. Future of Antimony Market
10. Competitive Landscape
10.1 Mergers and Acquisition
10.2 Joint Ventures, Collaborations, and Agreements
10.3 Market Share Analysis
11. Company Profiles
11.1 Artemis Resources
11.2 Beijing North Xinyuan Electrical Carbon Products Co.Ltd
11.3 Campine
11.4 Glencore Xstrata
11.5 Huachang Antimony Industry
11.6 Hunan ChenZhou Mining Group Co. Ltd.
11.7 Korea Zinc
11.8 Lambert Metals International
11.9 Mandalay Resources Corp.
11.10 Nihon Seiko
11.11 Qingdao Glory International Trading Co.
11.12 Recylex
11.13 Shanghai Metal Corporation
11.14 Tri-Star Resources Plc
11.15 United States Antimony Corp.
11.16 Village Main Reef Ltd.
11.17 Yunnan Muli Antimony Industry Co. Ltd.
