Executive Summary

Pet food is one of the major segments of the pet industry which is intended for the consumption of pets. Nowadays, pets are one of the most important parts of lives of individuals as they provide psychological and physiological benefit to human life. Whether it is a cat, dog, or other domesticated animal, they are interwoven into the social and emotional fabric of individuals and families lives.

Global pet food market increased at a significant CAGR during the span of 5 years i.e. 2011-2014 and projections are made that the market would rise in the next five years i.e. 2015-2020 tremendously. Global dog and cat food market is a segment of global pet food market which exhibited an increase, driving the global pet food market. The upsurge in the market was due to increased awareness among people about the need for pet food, easy availability of pet food in the market and increase in nuclear families across the globe.

The major growth drivers for the pet food market are: increase in pet population and urban population, rise in per capita disposable income and the increasing humanization towards pets. Despite the market is governed by various growth drivers, there are certain challenges faced by the market such as: rise in prices of pet treats, grinding challenge and microbial challenges.
