Mobile sewage treatment systems are modular or movable systems used for treatment of sewage at the site of generation. Mobile sewage treatment systems are compact, easy to install and energy efficient system that don't require any kind of skilled labor to carry out operations as compared to conventional sewage treatment systems. As a result, with growing demand and awareness about the benefits of such mobile sewage treatment systems in the country, these systems are expected to witness increasing use in residential and industrial sectors over the next few years.
