Australia cards and payments market overview.

In terms of number of cards in circulation, the Australian payment cards market grew at a CAGR of 4.1% during the period 2012-2014. The growth of cards in circulation during the period 2012 -2014 can be attributed to a rising banked population, growing disposable income, the expansion of ATMs and POS terminals, and greater acceptance of payment cards in the country. During the forecast period, the payment card transactions in Australia is expected to grow at 5% CAGR.

Food and drinks were the most frequently purchased items in Australia, using both debit and credit cards. The food and drinks category was followed by clothing and footwear in second position, which accounted for 14.6% of total transactions in the debit card category and 14.1% in the credit card category.

In Australia, the debit cards dominate the payment cards market in terms of number of cards in circulation. Debit cards are being used by consumers to shop at retail outlets, withdraw cash from ATMs and make online payments. Debit card frequency of use increased from 103.3 in 2012 to 110.6 in 2014, at a CAGR of 3.5%. Credit cards are primarily used by consumers at POS terminals for retail purchases, rather than for cash withdrawals at ATMs. In 2014, transactions at POS terminals accounted for 99% of total credit card transactions in Australia. MasterCard was the leading scheme in the credit card market in 2014. The frequency of credit card use increased at a CAGR of 5.3% during 2012-2014. The frequency of transaction for credit card is expected to reach up to 109.8 times by 2020.

The value of charge card transactions at POS terminals represented 99.4% of total charge cards transaction value in 2014.
