
Description: The total Europe Pet Nutraceuticals market is valued at over $1413.5 million in 2015 and is projected to reach over $XX million by 2020 growing at a CAGR of XX% between the years 2015 and 2020. The pet nutraceuticals market is defined as dietary supplements, functional foods or medicinal food products that provide a source of a recognized essential nutrient, like calcium or vitamin A. They are intended to work as supplements and ensure the nutritional completeness of the pet diet.

European market, despite being a trend driven one, is characterized by a high degree of sophistication, consumer awareness and ingredient consciousness. The trends of pet ‘humanization’ and ‘premiumization’ are very prevalent and popular among the Europeans. Apart from the comfort and aesthetic pleasure of owning pets, pets are being seen as human companions and are cared for in a similar manner. Pet health care becomes an important part in this regard, with a marked shift towards more premium and healthy foods. According to one source, the veterinary services rose by nearly 10% in the recent years showing the importance placed on professional care for pets. The growing incidence of pet obesity is causing most consumers to be conscious of their pet food choices. The increasing allergic reactions to certain foods are another important constraint to the market, the increasing sales of food allergen based foods is an indication of the importance of this market.

The market is differentiated based various factors such as that of animal type, function type, ingredient type, application type and geography. Based on the animal type, the pet food sales are adjacent to the respective animal populations with dogs and cats occupying the major share. An increasing shift towards smaller breeds of dogs and cats is being observed in the recent years. On the end-user application muscle health, cognitive health, Digestive health continues to be the major concerns among pet owners, driving product sales in these segments. The differentiation between dietary supplements and nutraceuticals holds importance from a marketing and regulatory standpoint. The specific cultural and aesthetic aspects associated with European countries plays a significant role in the form of food flavors, functional aspects and marketing variables. ADM, Scoular, Merial, Novotech, and Mars are the major players in the industry.
