
Description: Non Lethal weapons or less than lethal weapons are those weapons which are relatively less likely to eliminate the desired target than the conventional weapons. Nowadays with such a high focus on any perceived Human Rights Violations around the world there is a particular need for a wide array of non lethal weapons that would at least completely eliminate the need to use conventional weapons for domestic issues such as crowd control etc. One of the most common Non Lethal Weapon used is the tear gas and rubber bullets which are generally used to disperse the crowd. Death or even lasting injuries are avoided by using these Non Lethal Weapons but in exceptional cases they do prove to be fatal because of a misplaced shot or an allergic reaction by the person to the Agent Used.

The Developed World is leading the growth in the Non Lethal Weapons Market with North America And Europe being the Leaders in the market. But United States of America holds the highest market share in the Non Lethal Firearms Business with over 3/4ths of the Market. But even the developing world offers tremendous opportunities in this sphere as most of their forces because of low budgets use conventional weapons even for crowd dispersal which is extremely dangerous. But with rising income levels across the world the defense and law enforcement budgets are set to rise in the near future and then the Market For Non Lethal Weapons is Expected to boom.

The Non Lethal weapons market led by Europe and Asia is expected to achieve a CAGR of 5.77% and is expected to reach a market size of $7.69 billion by 2020.
