
Description: The Brazil C4ISR Market will account to $1.53 billion by 2020. This market will grow from $1.2 billion in 2015 at a CAGR of 5.03% over the coming 5 years.

There has been a lot of activity happening in the Brazilian defense sector, specifically in the C4ISR space as Brazil strives to become a global power in the coming years. In order to strengthen its defenses it recently awarded a $4.7 billion contract to SAAB AB to replace its ageing fleet. Brazil will receive 36 Gripen NG Multirole Aircraft, which will be equipped with state of the art C4ISR Systems. The Air based platforms will be contributing the most to the growth of the C4ISR market in Brazil and will grow at a very high CAGR of 10.56% over the next 5 years. Also Brazil will put impetus in acquiring Command and Control systems to assist in its operations, which will rise to a size of $247 million by 2020, at a very high CAGR of 8.93% over the forecasted period.

On the downside, the major restraint for the C4ISR Market in Brazil is the economic slump in which the country is currently engulfed. The Brazil economy is expected to contract by 2% in FY15, and the contraction will most likely extend to 2016. Economic crunch and a falling Real has the potential to derail the C4ISR market in the country. However, the Brazilian economy is expected to come into positive territory by 2017, which will boost the C4ISR Market.

Luciad, Embraer and Harris Corporation are some of the important upcoming players in the Brazil c4isr market. The market has been segmented by Type (Command & Control, ISR, Computer, Communication, Electronic Warfare) and Platform (Land Based, Air Based, Sea Based, Space Based).
