Description: The Middle East Non Lethal Weapons Market is expected to grow at a CAGR of 6.15% till 2020. The Middle East has been in a vigorous and unremitting turmoil post 2010, a situation, which has only intensified and engulfed many countries. Since 2010 Syria, Libya, Egypt and Yemen have suffered huge amounts of violence and have still not returned to normalcy. The Internal Security situation in most of the Middle East with the possible exception of Gulf Cooperation Council countries is fairly unstable and the countries like Saudi Arabia have been making huge investments to ensure that the violence remains out of its borders.

Despite the crash in oil Prices, Saudi Arabia, which is the largest oil exporter in the world, has not cut its expenditure on defense and homeland security. As a matter of fact, it has increased it, giving an indication of the importance being given to peace internally. The nuclear deal with Iran has opened up Iran, which is a huge captive market, and is hugely underpenetrated due to the trade sanctions against it. Saudi Arabia in order to maintain internal peace will continue to be a big buyer of Non Lethal Weapons. Iran, which is technologically backward than its peers, will be keen to equip its law enforcement agencies, as the sales of such equipment, becomes legal to the country.

Though the human rights record Middle Eastern countries as worse off than its Western Counterparts, these states will try to ramp up their procurement of Non Lethal Weapons in their arsenal.

Lamperd Less Lethal, Non Lethal Technologies, Dignia Equipments are some of the important players in the Middle East Non Lethal Weapons Market. The market has been segmented by Product (Ammunition, Direct Contact Weapons, Directed Energy Weapons, Others), End Users (Law Enforcement, Special Forces, Others) and by Region (Saudi Arabia, Iran, Israel, Others).
