
Description: Labels play an important part in the marketing of a product, product identification, brand promotion and logistics; thus representing as the key element of the packaging in all industries. The design of the labels on the package reflects the brand's message and the brand identity.

The Global Print Label Market is estimated to witness moderate growth to reach $43.57 billion by the end of year 2020 at a CAGR of 5.91% over the forecasted period (2015-2020). Changing needs of buyers, greater acceptance of color digital printing, demand for more personalized offerings are going to drive the market. In 2015, pressure sensitive or self-adhesive labels will constitute the largest market share, as they are one of the most versatile labels available in the market. Of all the Print Label technologies, Digital Printing will witness highest growth over the forecast period due to its cost-effectiveness and professional high-quality printing in industrial size digital press.

Asia Pacific will dominate the market, followed by North America and Europe. Flexography is the most common print process but the advanced digital methods are growing at a faster rate, seizing the market share. The uses of print labels aren't restricted to just one industry and vary from FMCG industry, Healthcare, Manufacturing, Agriculture, Fashion to Automotive and others. The integration of digital technology with the existing label printing technique is bound to bring a huge change to all the small-scale as well as large-scale sectors.
