HPV Testing & Pap Test Market by Test Type (HPV Testing (Follow-Up, Co-Testing, Primary)), by Application (Pap Test (Cervical Cancer, Vaginal Cancer)), by End User (Laboratories, Hospitals, Physicians' Offices & Clinics) - Global Forecast to 2020

Description:
Increasing awareness of cervical cancer screening programs, and government initiative and funding are the Major Drivers of the HPV testing and Pap test Market.

On the basis of test type, the HPV testing and Pap test market is divided into two major segments, namely, HPV testing and Pap test. The HPV testing segment is further classified into three sub-segments, namely, follow-up HPV testing, co-testing, HPV primary testing. The Pap test segment is expected to account for the largest share of the HPV testing and Pap test market in 2015. But this segment is projected to decline at a negative during the forecast period due to due the shift towards the use of HPV testing, as it provides enhanced accuracy and sensitivity than Pap test. Furthermore, the HPV testing segment is expected to grow at the highest CAGR in the next five years, owing to increasing incidences of cervical cancer, raising awareness of HPV screening, as well as the introduction of HPV primary test.

On the basis of type of application, the global HPV testing and Pap test market is classified into two major segments, namely, cervical cancer screening and vaginal cancer screening. The cervical cancer screening application segment is expected account for the largest share of the Pap test market in 2015. This large share can be attributed to the increasing incidences of cervical cancer and government initiatives to spread the awareness about cervical cancer screening.

On the basis of type of end user, the HPV testing and Pap test market is classified into three segments, namely, hospitals, laboratories, physicians’ offices and clinics. The laboratories end-user segment is expected to account for the largest share of the HPV testing and Pap test market in 2015. Furthermore, the hospitals end-user segment is expected to grow at the highest CAGR in the next five years, as most of the diagnostic tests are carried out in-house in hospitals with advanced technologies in shorter period of time.

From an insight perspective, this research report focuses on qualitative data, market size, and growth of various segments and subsegments, competitive landscape, and company profiles. The qualitative data covers various levels of industry analysis such as market dynamics (drivers, restraints, opportunities, and threats). The report also offers market sizes and data of the various segments in this industry. It focuses on emerging and high-growth segments, high-growth regions, and initiatives by governments. The competitive landscape covers the growth strategies adopted by industry players in the last three years. The company profiles comprise basic views on the key players in the HPV testing and Pap test market and the strategies adopted by them to maintain and increase their market shares in the near future.

Reasons to Buy the Report:
This report will enable both established firms as well as new entrants/smaller firms to gauge the pulse of the market, which in turn will help these firms, garner a greater market share. Firms purchasing the report can use any one or a combination of the below-mentioned five strategies (market penetration, product development/innovation, market development, market diversification, and competitive assessment) for strengthening their market shares.

The report provides insights on the following pointers:
- Market Penetration: Comprehensive information on cervical cancer screening tests offered by top 10 players in the HPV testing and Pap test market. The report analyzes the HPV testing and Pap test market by product, application, and end user across geographies.

- Product Development/Innovation: Detailed insights on upcoming technologies, research and development activities, and new product launches in the HPV testing and Pap test market.

- Market Development: Comprehensive information about lucrative emerging markets. The report analyzes the markets for HPV testing and Pap test across geographies.

- Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the HPV testing and Pap test market.
- Competitive Assessment: In-depth assessment of market shares, strategies, products, distribution networks, and manufacturing capabilities of leading players in the HPV testing and Pap test market
