Animal Parasiticides Market by Product, by Animal - Global Forecast to 2020

Description: "Animal Parasiticides Market by Product (Endoparasiticides, Ectoparasiticides, Endectocides, Oral Liquids, Tablets, Injectables, Sprays, Pour-on, Spot-on, Collars, Ear Tags) by Animal (Dogs, Cats, Cattle, Pigs, Sheep and Goats, Poultry) - Global Forecast to 2020"

The global animal parasiticides market is estimated to grow at a CAGR of 5.7% from 2015 to 2020, to reach USD 9.75 billion by 2020 from USD 7.41 billion in 2015. Increasing awareness about animal healthcare, rising demand for animal-derived food products, growth in the adoption of companion animals, and rising concern to prevent zoonotic diseases are the major factors driving the growth of the animal parasiticides market. Rising veterinary practices, huge investments from government organizations and private players for R&D activities, and increase in the animal healthcare expenditure have further propelled the growth of the animal parasiticides market. However, growing preference for vegetarian diets, stringent approval process for animal parasiticides, and restriction on the use of parasiticides in food-producing animals may hinder the growth of this market to a certain extent during the forecast period.

In this report, the animal parasiticides market is segmented on the basis of product, animal type, and region. On the basis of products, the market is segmented into ectoparasiticides, endoparasiticides, and endectocides. The ectoparasiticides segment accounted for the largest share of the animal parasiticides market in 2014, owing to its application in livestock as well as companion animals. On the basis of animal type, the animal parasiticides market is segmented into companion animals and food-producing animals.

Geographically, the global animal parasiticides market is segmented into North America, Europe, Asia-Pacific, and the Rest of the World. In 2014, Europe commanded a major share of the animal parasiticides market. However, Asia-Pacific is expected to witness the highest growth rate during the forecast period. Growth in the Asia-Pacific market can be attributed to rising companion animal population and increase in the demand for animal-derived food products.

Some of the prominent players in the animal parasiticides market include Sanofi (France), Ceva Sante Animale (France), Virbac (France), Vetoquinol S.A. (France), Eli Lilly and Company (U.S.), Zoetis, Inc. (U.S.), Merck and Co., Inc. (U.S.), Bayer AG (Germany), Boehringer Ingelheim (Germany), and Perrigo Company plc (Ireland).

Reasons to Buy the Report:

The report will enrich both established firms as well as new entrants/smaller firms to gauge the pulse of the market, which in turn will help firms in garnering a greater market share. Firms purchasing the report could use any one or combination of the below-mentioned five strategies (market penetration, product development/innovation, market development, market diversification, and competitive assessment) for increasing their market shares.

The report provides insights on the following pointers:

- Market Penetration: Comprehensive information on the product portfolios offered by the top players in the animal parasiticides market. The report analyzes the animal parasiticides market by product, animal type, and region.

- Product Development/Innovation: Detailed insights on the upcoming trends, research and development activities, and new product launches in the animal parasiticides market.

- Market Development: Comprehensive information about lucrative emerging markets by product and region.

- Market Diversification: Exhaustive information about new products, growing geographies, recent developments, and investments in the animal parasiticides market.

- Competitive Assessment: In-depth assessment of market shares, growth strategies, products, and manufacturing capabilities of leading players in the animal parasiticides market.
