Global Seed Market - Segmented By Crop Type, Trait And Geography - Trends And Forecasts (2015-2020)

Description: The global Seed market by revenue was $58.6 billion in 2015, and is projected to reach $92.3 billion in 2020, witnessing the growth at a CAGR of 9.4% for the forecast period.

Asia-Pacific is the biggest market for seeds with a share of about 32.7%, and is expected to remain at the top for the forecast period, which is closely followed by North America. Europe is the other major market covering a share of 23.5% in the global seed market in 2015. The continually growing world population drives the seed market. In addition, rising demand of biofuels is mounting pressure on agricultural lands to increase yield of crops such as corn, which is a key ingredient in producing ethanol. Other key factors which are expected to drive the growth of global seeds include increased consumption of animal fodder to meet the growing population of cattle and a rising need in commodities such as vegetable oil. However, major concerns over Genetically Modified foods among the public and a minority of scientists exist regarding their ill effects on the human health and potential adverse effects to the environment.

The global seed market is segmented by crop type into oilseed, grain seed, fruit and vegetable and other seeds. Major crops under oilseed such as soybean, sunflower, rapeseed, and cotton have been analyzed in this report. Crops under grain seed such as corn, wheat, rice, and barley are also studied. The second segmentation is based on traits of Genetically Modified seeds.

This report estimates and projects the global market for Seeds for the period 2014-2020, in terms of value (US$ million) by geographic regions including North America, Europe, Asia-Pacific, South America and Africa.
