About Port and Industrial Tire Market in Asia Pacific

Port and industrial tires are designed for use in port handling equipment and airport ground handling equipment. These tires fall under the tire market segment called off-the-road (OTR) tires.

The OTR tires can be segmented based on end-users, or the industries that use them, which include mining, construction, seaports, and airports among others.

The OTR tires designed for use by seaport handling and airport handling equipment are based on the conventional type of tires; however, they are specially designed and manufactured to suit the seaport and airport equipment handling demands, keeping in view specific load handling requirements and environmental factors.

Some of the tire types are:

- Radial tires
- Super elastic tires
- Treadless tires
- Cross ply tires

The analysts forecast the port and industrial tire in APAC to grow at a CAGR of 8.25% during the period 2016-2020.

Covered in this report

The report covers the present scenario and the growth prospects of the port and industrial tire market in Asia Pacific (APAC) for 2016-2020. The market has been calculated on the basis of production by OEMs and deliveries to ports.

The market is divided into the following segments based on application:

- Port handling equipment
- Airport ground support equipment

The report, Port and Industrial Tire Market in Asia Pacific 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors:

- ATG
- Balkrishna Industries
- Continental Tires
