Database Encryption Market by Types (Transparent Encryption, File-system Encryption, Application-level Encryption, Column-level Encryption, Hashing and Key Management), by End User, by Deployment Types, by region - Global Forecast to 2020

Description:

Increasing demand for cloud-based database by organizations is expected to play a significant role in augmenting the growth prospects in the database encryption market. The database encryption market is expected to grow from USD 261.8 million in 2015 to USD 968.3 million by 2020, at a Compound Annual Growth Rate (CAGR) of 29.9%. The market is being driven by factors such as increasing need for compliance with regulatory mandates by organizations for data protection and the increasing demand for cloud services and cloud-based databases.

BFSI, healthcare, and government & public sector industries are expected to hold the largest market share during the forecast period. Due to increasing Bring Your Own Device (BYOD), mobility, and other digitalization trends among industries such as BFSI, healthcare, IT & telecom, and government & public sector, the volume of business data and personal data of customers in such industries has also increased in these verticals. Thus, since these industries need to manage and secure the huge volumes of data stored in their databases, they are expected to grow at the highest CAGR during the forecast period.

North America is expected to hold the largest market share in the database encryption market. North America is expected to hold the largest market share of the database encryption market during the forecast period, followed by Europe. The adoption of any new or emerging technology is adopted at a higher rate in North America than in any other region. Moreover, the adoption of cloud, mobility, and BYOD is highest in North America, leading to the generation of confidential data. Thus, the need to protect this data is encouraging organizations to adopt database encryption solutions in the region. Asia-Pacific is expected to grow at the highest CAGR in the database encryption market during the forecast period.
