Executive Summary

A vehicle that consolidates transportation and transitory living quarters for travel, entertainment and outdoors is called a recreational vehicle (RV). In other words, an RV is a vehicle designed for recreational use, as in camping.

There are many advantages of owning and travelling in an RV, such as traveling in an RV is more affordable than traveling in many other ways; often home life can be stressful, but enjoying life in a recreational vehicle is relaxing; traveling in an RV means traveling to scenic places, resorts, campgrounds and various recreational spaces, etc.

The RV equipment market, which manufactures all the equipment used in an RV can be divided into RV OEM (Original Equipment Manufacturer) Market and After Market. The company that makes a part or a subsystem that is used in another company's end product or a company whose products are used as components in another company's product, is known as Original Equipment Manufacturer (OEM). The recreational vehicle aftermarket is the business sector of the recreational vehicle industry, concerned with the assembling, re manufacturing, distribution, etc. after the sale of the RV by the original equipment manufacturer (OEM) to the consumer.
