Iran Construction Equipment Market (2016-2022)

Description: Post implementation of US sanctions, the economy of Iran declined significantly. The sanctions impacted several infrastructure development activities throughout the country. Moreover, country's currency depreciated drastically along with the FDIs. However, economic conditions are expected to change 2016 year onwards on account of complete removal of sanctions.

In Iran's construction equipment market, excavator segment accounted for majority of the revenue share followed by the loaders, cranes, bulldozers and motor graders. By 2022, share of excavator's segment is expected to decline owing to growing demand for backhoe loaders in the country.

In Iran's construction equipment market, construction industry accounted for the largest share followed by mining and oil & gas industries. In the forecast period, mining industry is anticipated to excel its share attributed to foreign investments.
