Pipe Coating Market by Type (Thermoplastic, Metal, Fusion Bonded Epoxy, Concrete Weight, and Others), by End-Use Industry (Oil & Gas, Industrial, Chemical Processing, Municipal Water Supply, and Others), by Region - Global Forecasts to 2020

Description:
“The increasing demand from industrial and chemical processing end-use industries and high economic growth in the Asia-Pacific countries is driving the pipe coatings market”
The market size for pipe coatings is projected to reach USD 11.63 billion by 2020, registering a CAGR of 4.5% between 2015 and 2020. Increasing demand from end-use industries such as industrial and chemical processing is the major driver for the pipe coatings market. Further, growing sewage industry in developing countries is expected to drive the pipe coatings market.
“Industrial and chemical processing are the fastest-growing end-use industries of pipe coatings”
Industrial and chemical processing are the largest end-use industries of pipe coatings. As pipe coatings are characterized by flexibility, toughness, and high abrasion resistance, they protect the pipes from corrosion and increase their durability. Industrial segment is another fastest-growing end-use industry of pipe coatings for civil infrastructure, energy, sewage, and mining industries, globally.
“North America is the largest market for pipe coatings”
North America is the largest market for pipe coatings due to the presence of numerous key companies in the region and growth in demand due to increase in pipeline construction activities in the region. Abundance of shale oil & gas reserves in the country, upsurge in production from shale operations, and deep-water E&P in the Gulf of Mexico are some of the major factors influencing the pipe coatings demand in the region. The superior mechanical and anti-corrosion properties, low conductivity, and longer shelf-life have increased the demand of pipe coatings for general purpose as well as in specialty end-use industries.
