Optical Brighteners Market by Application (Paper, Fabrics, Detergents & Soaps, Synthetics & Plastics & Others), by End User (Consumer Products, Textiles & Apparel, Packaging, Security & Safety & Others) - Global Forecast to 2020

Description: “Optical brighteners market to grow at a CAGR of 9.6%”

The optical brighteners market size is estimated to reach USD 1.05 billion by 2020 at a CAGR of 9.6% between 2015 and 2020. Light fastness, low volatility, chemical stability, and heat resistance are the key properties of optical brighteners, which make it the preferred material for various applications. Optical brighteners provides industries with immense development opportunities of newer materials, which have enhanced properties and improved brightness, thus driving the market growth.

“Paper the largest application of optical brighteners”
Growing consumption of optical brighteners in coated as well as uncoated paper play a significant role in driving the market. Optical brighteners are also used in the production of uncoated fine paper, particularly in uncoated fine paper grades containing high-yield pulp (HYP). Increasing level of whiteness and the HYP substitution in fine papers have increased the importance of optical brighteners globally in the recent years. The Indian government has started investment promotion programs to assist companies that are developing and manufacturing paper, pushing the growth of this market upward. Growing innovation and development, along with increasing demand from the consumer industries for better paper products, are directly increasing the demand for paper in optical brighteners market.

“Rising demand in Asia-Pacific is the major growth driver for Optical Brightener market”
In 2015, Europe was the largest market for optical brighteners but Asia-Pacific registered the highest growth rate during the period forecasted between 2015 and 2020. The region is projected to register the highest growth rate, both in terms of value and volume, owing to high demand from China and India. China is the second largest market (after U.S.) for optical brighteners globally with major demand from paper application. Growing innovation and developments and demand in the consumer industries for better products is directly affecting the rise in the use of optical brighteners in Asia-Pacific region.

Extensive primary interviews were conducted to determine and verify the market size for several segments and subsegments gathered through secondary research.

The key companies profiled in this market research report are BASF SE (Germany), RPM International Corp. (U.S.), Keystone Aniline Corporation (U.S.), Aron Universal (India), Huntsman Corporation (U.S.), Clariant AG (Switzerland), Brilliant Colors Inc. (U.S.), 3 V Incorporation (U.S.), and The Fong Min International Company Limited. (Taiwan), and Archroma (Switzerland).

The report will help the market leaders/new entrants in this market in the following ways:

1. This report segments the Optical brighteners market comprehensively and provides the closest approximations of market sizes for the overall market and subsegments across verticals and regions.

2. The report will help stakeholders understand the pulse of the market and provide them information on key market drivers, restraints, challenges, and opportunities.

3. This report will help stakeholders understand the major competitors and gain insights to enhance their position in the business. The competitive landscape section includes expansions, new product developments, and mergers & acquisitions.

3 Executive Summary

4 Premium Insights
   4.1 Attractive Market Opportunities for Optical Brighteners
   4.2 Optical Brighteners Market Share, By Application And Region
   4.3 Applications of Optical Brighteners Market, By Region

5 Market Overview
   5.1 Introduction
   5.2 Segmentation
      5.2.1 By Application
      5.2.2 By End User
      5.2.3 By Region
   5.3 Market Dynamics
      5.3.1 Drivers
         5.3.1.1 Growing Demand from Synthetics & Plastics Industry
         5.3.1.2 Rising Demand for Biodegradable Brighteners
         5.3.1.3 Growing Textiles & Apparel Industry in Asia-Pacific
      5.3.2 Restraints
      5.3.2.1 Non-Stilbenes Brighteners Acting As a Substitute for Optical Brighteners
      5.3.3 Opportunities
         5.3.3.1 Emerging Applications in Printing Inks And Photo Processing Industries
      5.3.4 Challenges
         5.3.4.1 High Cost of Production
