Process Safety Management (PSM): 7 Tips for PSM and Risk Management Program Compliance - Webinar

Description:
Date: April 22nd, 2016
Time: 10:00 AM PDT, 01:00 PM EDT

In this webinar, expert speaker Sheldon Primus, MPA, COSS will illustrate the similarities and differences of the Process Safety Management (PSM) to the Risk Management Program (RMP) programs and will show you how to be compliant with both standards. This session will provide you with the tools and tips needed to comply with both the RMP and PSM standards, and offer a practical guide to continued compliance.

Objectives of the Presentation:
- Identifying your program level
- Understanding the difference in the compliance with PSM and RMP standards
- Instructing on the compliance schedule
- Recognizing hazards related to both programs
- Understanding best practices in operating procedures
- Understanding training requirements
- Educating on multi-employer doctrines
- Recognizing maintenance requirement
- Instructing on incident management
- Educating on best management practices for internal audits
- Know compliance standards for PSM and RMP programs
- Understand the training requirements for the programs
- Recognize hazards related to highly hazardous chemicals
- Know your duties with a multi-employer site
- Gain tips to incident management

Why Should you Attend:
The EPA’s Risk Management Program is a necessary but daunting regulation that imposes strict adherence and heavy consequences for non-compliance. These tips are designed to keep utilities safe in every sense.

The Risk Management Program (RMP) is a U.S. EPA initiative that tracks, audits, and regulates facilities with extremely hazardous substances (EHSs) and toxic chemicals over a certain quantity, including Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or “Superfund”) sites. Congress enacted the Emergency Planning and Community Right-to-Know Act (EPCRA) in 1986 as a reaction from the 1984 Bhopal, India accident where a Union Carbide chemical plant had a release of methyl isocyanate. This incident caused thousands to die and many injuries in India, and six months later a chemical release of similar type occurred in West Virginia (EPA, 2012). Therefore, Congress moved under the Code of Federal Regulations (CFR) by issuing Title 40 to create ways of protecting the American public.

However, the EPA does not have jurisdiction between the employer/employee relationship. This is a function of the Occupational Safety and Health Administration (OSHA). Where the RMP protects the general community from highly hazardous chemicals, the Process Safety Management (PSM) protects the employees from highly hazardous chemicals.

Who can Benefit:
- CEO or Company Executive
- Compliance & Safety Officer
- Director of Risk Management
- Director of Human Resources
- Regulatory Compliance Agent
- Risk Advisor-Insurance Companies
- General Contractors
- Process Technicians
- Warehouse Managers
- General Employees
