Psychology of Learning and Motivation, Vol 65

Description: Psychology of Learning and Motivation publishes empirical and theoretical contributions in cognitive and experimental psychology, ranging from classical and instrumental conditioning, to complex learning and problem-solving.

Each chapter thoughtfully integrates the writings of leading contributors, who present and discuss significant bodies of research relevant to their discipline. Volume 65 includes chapters on such varied topics as prospective memory, metacognitive information processing, basic memory processes during reading, working memory capacity, attention, perception and memory, short-term memory, language processing, and causal reasoning.

- Presents the latest information in the highly regarded Psychology of Learning and Motivation series
- Provides an essential reference for researchers and academics in cognitive science
- Contains information relevant to both applied concerns and basic research
