Market Overview
VSATs numbers are growing steadily throughout many industries and market segments. With new applications and shifts in target markets, VSAT based solutions are being adopted at increasingly higher rates since 2002. However, competition from terrestrial alternatives is gradually building within traditional major markets as infrastructure build-out continues to grow. This study provides a comprehensive look at the entire VSAT industry, with future hot markets, technology trends, and competitive analysis to help companies direct their strategic goals for greater market penetration.

The research service examines the main driving forces and challenges for the world VSAT markets. The research includes unit and revenue forecasts for both the corporate and enterprise networks market and the consumer and SOHO market. Forecasts are given on a global scale as well as for the five world regions. Traditional applications, such as corporate networks, point-of-sale, and Internet access, along with more recent growth applications, such as rural telephony, telemedicine, and disaster recovery networks, are all discussed. The VSAT hardware industry, within the included market segments, is valued at over $560 million, and significant challenges lie ahead for industry players. The study outlines key market drivers and restraints as well as market share within each of the segments covered. Technology trends, regulatory issues, and a standards overview are also discussed within the study.
