Global Air and Gas Leak Detectors Market 2016-2020

Description: About Air Gas Leak Detectors

Air and gas detectors are used to detect the presence of multiple gases in an area. The detectors help in detecting any flammable gases (such as methane and propane), kerosene or toxic gases (such as carbon monoxide, carbon dioxide, and sulphur dioxide), and oxygen depletion.

These detectors are used to monitor gas leaks so that a process can be shut down in the event of a gas leakage. The detector also sounds an alarm upon detecting a leakage so that workers can escape.

The analysts forecast the global air and gas leak detectors market to grow at a CAGR of 3.57% during the period 2016-2020.
