South Africa Video Surveillance Market (2016-2022)

Description:
- Expected growth in construction market, rising crime rate, upcoming new hotels & shopping malls, coupled with increasing urbanization rate are some of the few factors that have resulted in the overall growth of video surveillance market in South Africa.

In South Africa’s video surveillance market, IP video surveillance segment accounted for majority of the market revenue owing to major deployments in government & transportation vertical. However, in terms of volume, analog video surveillance systems accounted for majority of the volume share owing to low pricing and accessibility.

Weak economic conditions and currency depreciation have resulted in rise in ASP of video surveillance systems during 2010-15. Amongst all the verticals, government & transportation acquired largest revenue share of the market pie in the country. Over the next six years, commercial offices and healthcare & hospitality verticals are forecast to grow at relatively higher CAGR from 2016 to 2022.

Gauteng Province has accounted for the largest share in the market revenue due to growing construction activities in commercial and retail verticals. During the forecast period, Mpumalanga province region is forecast to grow at relatively higher CAGR from 2016 to 2022.

The report thoroughly covers the market by video surveillance types, by verticals, and by regions.
