Industrial Centrifuges Market by Product (Sedimentation - Decanter/Disc Centrifuge, Filtering), Operation (Batch, Continuous), Design (Horizontal/Vertical), End User (Power, Food, Waste Water, Pharmaceutical, Metal, Paper)-Global Forecasts to 2020

Description: The industrial centrifuges market is categorized on the basis of type, mode of operation, design, end user, and region. Factors such as the increasing demand for centrifuges in process industries, rising need for wastewater management solutions, and technological advancements in centrifuge systems are driving market growth. On the other hand, the high installation, operating, and maintenance costs of industrial centrifuges may restrict market growth in the forecast period.

North America accounts for the highest share of the global industrial centrifuges market. Rising demand for oil, increasing shale oil, and gas drilling activities, government initiatives to manage wastewater, flourishing food-processing industry, technological advancements, and government support for the development of innovative centrifugation systems are some of the factors driving the growth of the industrial centrifuges market in this region.
