"The ability to further improve the efficiency and visibility of the overall business process and adhering to ever increasing government compliances will drive the overall Business Process Management (BPM) market"

The BPM market size is estimated to grow USD 6.96 billion in 2016 to USD 13.52 billion by 2021, at a Compound Annual Growth Rate (CAGR) of 14.2% from 2016 to 2021. The BPM market is driven by factors, such as the need to improve the efficiency and visibility, adhere to increasing government compliance, and to increase the overall Return on Investment (ROI) of the organization.

"BPM solutions are expected to show positive growth trends during the forecast period"

The BPM solutions are expected to dominate the market from 2016 to 2021, with a larger share than the BPM services, due to growing business compliance challenges faced by the organizations worldwide.
