Social Network Sites for Scientists

Description:
Social Network Sites for Scientists: A Quantitative Survey explores the newest social network sites (for example, ResearchGate and Academia.edu) and web bibliographic platforms (Mendeley, Zotero) that have recently emerged for the scholarly community to use in the interchange of information and documents.

Chapters describe their main characteristics, what their advantages and limitations are, and the researchers that populate these websites. The surveys included in the book have been conducted following a quantitative approach, and measure the strength of the services provided by the sites in terms of use and activity. In addition, they also discuss the implications of new products in the future of scientific communication and their impact on research activities and evaluation.

- Analyses social network sites form scientists using a quantitative approach
- Introduces the quantitative study of the main characteristic and functionalities of each platform, and the activity that they develop
- Offers a scientific review of the most relevant and current studies on this issue, discussing their results and commenting on their implications for scientific communication and research evaluation

Contents:
Chapter 1: The First Attempts Chapter 2: Document Sharing services Chapter 3: Social academic bookmarking Chapter 4: Other relevant social tools Chapter 5: A Comparative view
