India Water Dispensers Market By Type (Bottled, Top Mounted and Upright), By Point of Sale, By End User (Residential, Commercial and Industrial), Competition Forecast and Opportunities, 2011-2021

Description: In India, the extracted ground water is usually saline and needs to be desalinated in order to make it suitable for human consumption. In addition to reduction in groundwater table, water quality in India is also deteriorating. Increasing water pollution is leading to higher salt and chlorine concentration in the water supplied for drinking purposes.

Therefore, an increasing number of consumers in India are opting for bottled water due to its trusted purification process, and this growing inclination towards bottled water is boosting demand for water dispensers in the country. Moreover, rising disposable income and growing health concerns are other underlying factors augment demand for water dispensers in the country.

According to “India Water Dispensers Market By Type, By Point of Sale, By End User, Competition Forecast and Opportunities, 2011-2021”, the water dispensers market in India is forecast to register a CAGR of more than 13% during 2016-2021. In 2015, the water dispensers market in India was dominated by the top mounted water dispensers segment.

Demand for water dispensers in India is predominantly concentrated in the West and South regions of the country due to growing demand from Rajasthan and Gujarat, and increasing number of commercial facilities in South India. In 2015, Voltas, Blue Star, Carrier Midea, Atlantis and Usha were the major players that dominated the country's water dispensers market and this trend is expected to continue through 2021.
