Gas Equipment Market by Industrial Gas, Type and Process - Forecast to 2021

Description: The global industrial gas handling equipment market size will grow from USD 51.93 billion in 2016 to reach USD 72.22 billion by 2021, at a projected CAGR of 6.82%. Increasing demand for industrial gases for diverse applications in metal fabrication, chemical, healthcare & medical, and oil & gas sectors is encouraging the growth of the industrial gas handling equipment market.

“Gas delivery systems segment is expected to remain the market leader through 2021”

The gas delivery systems formed the largest segment in the industrial gas handling equipment market in 2015. This segment is projected to hold the leading position through the forecast period. Due to its capability to provide efficient control over delivery pressure, purification, and distribution of gases, the equipment are widely used for the integrated handling of industrial gases from their sources to the-point of use. The types of gas delivery systems include gas cylinders, control panels, manifolds, switchovers, high pressure changeover systems, and protocol stations.

“North America dominated the industrial gas handling equipment market, in 2015”

North America recorded the largest consumption of industrial gas handling equipment in 2015 and is projected to dominate the market during the forecast period whereas the market for industrial gas handling equipment in the Asia-Pacific region is projected to grow at the highest CAGR from 2016 to 2020. The growth of this market is attributed to the growing metal fabrication sector due to the increasing demand from automobiles and consumer appliances industries, development of new technologies and machineries in the healthcare & medical sector, rapid industrialization in the emerging Asia-Pacific region, and stringent government regulations regarding worker and environmental safety.
