Global Mining Equipment Rental market 2016-2020

About Mining Equipment Rental

Mining equipment is used to extract natural resources such as metals, coal, and minerals, including iron ore, titanium, bauxite, and copper; gravel and sand; platinum and gold; and salt and other non-metallic products. Mining equipment includes trucks, dozers, loaders, borers, core drillers, stationary and portable crushers, dryers, feeders, hydraulic pumps, conveyor belts, and compressors.

Rental mining equipment accounts for a significant share in the global mining equipment market. The high cost of capital, overhead cost, and maintenance cost attached with the ownership of mining equipment have led end-users to rent mining equipment. The nature of a project and its duration are the key factors considered while purchasing or renting mining equipment. Generally, for a small-scale project scheduled for a short span, companies prefer to rent mining equipment as opposed to purchasing them. The analysts forecast the global mining equipment rental market to grow at a CAGR of 3.36% during the period 2016-2020.
